Sequence 3, Application US/09817180

Patent No. 6340584

GENERAL INFORMATION:

GENERAL INFORMATION:

APPLICANT: GAN, Weahin et al.

TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC

TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES

TITLE OF INVENTION: THEREOF

TITLE OF INVENTION: 2001-03-27

CURRENT APPLICATION NUMBER: US/09/817,180

CURRENT FILING DATE: 2001-03-27

NUMBER OF SEQ ID NOS: 4

SOFTWARE: FastsEQ for Windows Version 4.0

SEQ ID NO 3

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 82, Application US/09814915A

Patent No. 6750015

GENERAL NO. 6750015

APPLICANT: Richer, Jennifer

TITLE OF INVENTION: Progesterone Receptor-Regulated Gene Expression and Methods Relation TITLE OF INVENTION: Thereto

FILE REFERENCE: 2848-39

CURRENT APPLICATION NUMBER: US/09/814,915A

CURRENT FILING DATE: 2000-03-21

PRIOR APPLICATION NUMBER: 60/214,870

PRIOR APPLICATION NUMBER: 60/214,870

NUMBER OF SEQ ID NOS: 108

NUMBER OF SEQ ID NOS: 108

SOFTWARE: Patentin version 3.1
Sequence 15795, Application US/09949016

Patent No. 6812339

GENERAL INFORMATION:

TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF

TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF

TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF

CURRENT APPLICATION NUMBER: 08/09/949,016

CURRENT PILING DATE: 2000-04-14

PRIOR FILING DATE: 2000-10-20

PRIOR APPLICATION NUMBER: 60/241,768

PRIOR APPLICATION NUMBER: 60/231,498

PRIOR APPLICATION NUMBER: 60/231,498

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-10-03

GENERAL INFORMATION:

GENERAL INFORMATION:

APPLICANT: VENTER, J. Craig et al.

APPLICANT: VENTER, J. Craig et al.

TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES ASSOCIATED

TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF

FILE REFERENCE: CL001307

CURRENT APPLICATION UNMER: US/09/949,016

CURRENT FILING DATE: 2000-04-14

PRIOR APPLICATION NUMBER: 60/241,755

PRIOR FILING DATE: 2000-10-20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1845
